Federal Communications Commission

To Whom It May Concern:

Reference: Docket 99-25

Polk County has a local LPFM community radio station, KPIE-LP in Dallas, Oregon. KPIE provides REAL local service to the community and takes an active part in the community by broadcasting local events, news and programs that pertain to Polk Co.

I have recently been made aware of the contents of the MITRE report and although I don't fully understand all the technical data, I do know that our station is being SEVERELY interfered with by another station about 60 miles away in Portland on the same frequency that DOES NOT serve this community. If the recommendations of the MITRE report were followed and Congress allowed the FCC to remove the third adjacent channel rule then our local station KPIE, could move to a CLEAR frequency where we could hear them as we should be able to. I have lived in this area for 30 years and worked the last 10 in Polk County. For many reasons The community needs KPIE

I therefore support the conclusions and recommendations in the MITRE report and urge the Commission to recommend to Congress the removal of the third adjacent channel rule.
